Professional Summary

Flutter Developer with 5+ years of experience building **cross-platform mobile applications**, **scalable architectures**, and **high-performance UIs**. Skilled in **Dart**, **Flutter**, **Firebase**, **REST APIs**, and state management using **GetX**, **BLoC**, and **Provider**, and modern Android development using **Kotlin** and **Jetpack Compose**. Strong expertise in **modular app architecture**, **performance optimization**, **adaptive UI design**, and **CI/CD pipelines (GitHub Actions / GitLab CI)**. Proven ability to lead features end-to-end, mentor teams, and ship **production-ready, maintainable, and testable** applications.

Technical Skills

Languages: Dart, Java, Kotlin, C/C++

Frameworks / Libraries: Flutter, GetX, BLoC, Provider, Riverpod (basic familiarity)

Architecture: MVC, MVVM, Clean Architecture, SOLID, Clean Code

Animations: Lottie, Rive, Flutter Animation APIs

Tools: Git, GitHub, Android Studio, VS Code, Xcode, Figma, Jetpack Compose, Android Jetpack

Backend & APIs: Firebase (Auth, Firestore, Storage, FCM, Crashlytics), REST APIs, API Integration, JSON, Experience integrating Firebase Cloud Functions

Databases: Hive, SQLite, ObjectBox, Firestore

Other: Push Notifications, App Optimization, App Security, Play Store Deployment, CI/CD (GitLab, GitHub Actions), Unit Testing, Integration Testing

Professional Experience

Flutter Developer

O5Studio – Gujrat, Pakistan | Jun 2025 – Present

- Developed and published **25+ Flutter apps** with modular, scalable architecture.
- Integrated **Firebase Authentication, Firestore, Storage, FCM, Crashlytics**, and Remote Config.
- Built **pixel-perfect UIs**, responsive layouts, and adaptive theme handling.
- Optimized app performance using **profiling tools**, caching, lazy loading, and best practices.
- Implemented **GetX/BLoC** for complex state management across medium–large apps.
- Performed code reviews, mentored junior developers, and ensured **clean, maintainable code**.

Senior Android Developer

Yabo – Manila, Philippines | Jul 2024 – May 2025

- Migrated legacy Android codebase to Jetpack Compose and modern architecture.
- Built UI screens and features using Jetpack Compose, Kotlin, Coroutines, and Jetpack libraries.
- Delivered features using Kotlin, Android Jetpack, Coroutines, ViewModel.
- Improved app performance, stability, and accessibility across devices.
- Collaborated with cross-functional teams on testing, design, and product improvements.

Flutter Developer

O5Studio – Gujrat, Pakistan | 2023 – 2024

- Built full-stack Flutter apps using **Firestore, REST APIs**, and local databases.
- Improved app performance, animations, and user experience.
- Managed app deployments, versioning, and Play Store optimization (ASO).
- Coordinated with design and QA teams for smooth end-to-end delivery.

Flutter Developer

OXQ.IO – Lahore, Pakistan | 2021 – 2022

- Developed hybrid apps using Flutter and REST APIs with clean modular code.
- Implemented **BLoC, GetX**, reusable widgets, and scalable UI components.
- Enhanced architecture to support future extensibility and maintainability.

Android Developer

Be Spider – Lahore, Pakistan | 2018 – 2021

- Maintained and upgraded Android apps written in Java/Kotlin.
- Implemented new features, fixed bugs, and improved app startup/performance.
- Worked with QA teams to ensure error-free deployments.

Android Developer

O5Studio – Gujrat, Pakistan | 2016 – 2018

- Built native Android apps from scratch using Java/Kotlin.
 - Published apps to Play Store and managed updates, crashes, and analytics.
-

Education

BS in Computer Science – COMSATS University Lahore | 2010 – 2014

Intermediate in Computer Science – Government College University, Lahore | 2008 – 2010

Projects (On Google Play Store)

- **Smart Budget Tracker:** Finance tracker built using BLoC, Hive, Firebase services.
- **Hash Bazar:** E-commerce solution using Firebase Auth, Firestore, FCM, GetX.
- **Get QR Codes:** QR generator with templates using OneSignal, Firebase, BLoC.
- **Money Manager:** Full-feature expense app using SQLite.
- **All Scanners:** OCR, QR, and barcode scanner app.
- **Notes Pro Plus:** Note-taking with Firebase sync and backup.
- **Weather Forecast:** REST API-based weather visualization.
- **Poetry Apps:** Unicode poetry, books, and reader apps.
- **Urdu Lughat Dictionary Pro:** Offline dictionary using SQLite, JSON, GetX.
